## Policy statement

Springboard Nursery believes that children flourish best when their personal, social and emotional needs are met and where there are clear and developmentally appropriate expectations for their behaviour.

Children need to learn to consider the views and feelings, needs and rights, of others and the impact that their behaviour has on people, places and objects. This is a developmental task that requires support, encouragement, teaching and setting the correct example. The principles that underpin how we achieve positive and considerate behaviour exist within our programme for promoting personal, social and emotional development.

Some of the children that we care for have difficulty in expressing their emotions and may resort to biting. Staff endeavours to work together with parents/carers to develop consistent strategies to support those children for who biting is an issue, and to promote positive behaviour. The victims of biting, both children and adults, will be provided with appropriate and timely care and support.

## Procedures

Marie Hunter (Nursery Manager) and Jane Waggott are the named persons who have overall responsibility for our programme for supporting personal, social and emotional development, including issues concerning behaviour and physical assault.

We require the named person's to:

- keep themselves up to date with legislation, research and thinking on promoting positive behaviour and on handling children's behaviour where it may require additional support;
- Access relevant sources of expertise on promoting positive behaviour within the programme for supporting personal, social and emotional development; and
- Check that all staff has relevant in-service training on promoting positive behaviour.

We keep a record of all staff training, and it is the responsibility and expectation of all staff, learners, students and volunteers to:

- Recognise that codes for interacting with other people vary between cultures and require staff to be aware of - and respect - those used by members of the setting.
- Provide a positive model of behaviour by treating children, parents and one another with friendliness, care and courtesy.
- Adhere to this behaviour policy and its guidelines for behaviour.
- We expect all members of our setting - children, parents, staff, volunteers and students - to keep to the guidelines, requiring these to be applied consistently.
- Work in partnership with children's parents.
- Parents are regularly informed about their children's behaviour by their key person. We work with parents to address recurring inconsiderate behaviour, using our observation records to help us to understand the cause and to decide jointly how to respond appropriately.

## Staff responsibilities with regards to children biting

- Staff will work closely with all children to promote positive behaviour
- Staff will adhere to this policy to support those children for who behaviour particularly biting is an issue.
- Staff adhere to the settings first aid policy when dealing with injuries caused by biting. If the skin is broken following a biting incident, there is a small risk of acquiring tetanus and certain blood-borne viruses such as Hepatitis B, Hepatitis C and HIV, as well as a higher risk of acquiring a local bacterial infection. The management of such an injury therefore involves three stages:
  - Immediate first aid
  - Risk Assessment
  - Informing parents/carers and seeking medical advice
- Staff will keep accurate records of any incidents of biting, including any interventions and follow up actions.
- Staff will refer to other professionals as required, for those children who require additional support in managing their behaviour.
- For all children whom biting is an issue, detailed risk assessments will be completed by the nursery manager.
- The setting will ensure that parents/carers are actively encouraged to contribute to the development, implementation and review of any protocol developed for their child, where this is appropriate and possible. Other professionals involved with the protocol will also be actively encouraged to contribute to the development and review of such protocols.
- The Nursery manager / key person within nursery will be responsible for informing parents/cares of any incidents of biting, the action taken and any follow up required.

## Strategies to prevent a child from biting:

- Shadow the child at all times, child to be involved in activities at all times and not left to wander around the room.
- At mealtimes / singing / story and small group times child to be sat next to a member of staff.
- While outside child to be shadowed during the activity they are engaged in.
- If the key worker leaves the room for example lunch, then another member of staff to stay with the child at all times.

## First Aid procedure for all injuries caused by biting:

- Where the skin is broken the affected area should be allowed to bleed if possible.
- Whether the skin is broken or not the affected area should be washed thoroughly with soap and cold running water.
- Whether the skin is broken or not a cold compress should be applied, and the area dressed if necessary.
- Medical advice should be sought as quickly as possible, if appropriate.
- In all cases the victim's immunisation record should be checked, where possible, for protection against Tetanus and Hepatitis B.

- Where the skin is broken or the injury is still thought to be serious the perpetrator's immunisation record should be checked, where possible, for protection against Tetanus and Hepatitis B.

## Strategies with children who engage in inconsiderate behaviour

- Springboard Nursery require all staff, learners, volunteers and students to use positive strategies for handling any inconsiderate behaviour, by helping children find solutions in ways which are appropriate for the children's ages and stages of development. Such solutions might include, for example, acknowledgement of feelings, explanation as to what was not acceptable and supporting children to gain control of their feelings so that they can learn a more appropriate response.
- We ensure that there are enough popular toys, resources, and sufficient activities available so that children are meaningfully occupied without the need for unnecessary conflict over sharing and waiting for turns.
- We acknowledge considerate behaviour such as kindness and willingness to share.
- We support each child in developing self-esteem, confidence, and feelings of competence.
- We support each child in developing a sense of belonging in our group, so that they feel valued and welcome.
- Springboard Nursery avoids creating situations in which children receive adult attention only in return for inconsiderate behaviour.
- When children behave in inconsiderate ways, we help them to understand the outcomes of their action and support them in learning how to cope more appropriately. Children are able to have 'time out' to reflect if they need to.
- We never send children out of the room by themselves, nor do we use a 'naughty chair' that excludes children from the group.
- We never use physical punishment, such as smacking or shaking. Children are never threatened with these.
- We do not use techniques intended to single out and humiliate individual children.
- We would use physical restraint, such as holding, only to prevent physical injury to children or adults and/or serious damage to property.
- Details of such an event (what happened, what action was taken and by whom, and the names of witnesses) are brought to the attention of our Manager and are recorded in the child's personal file. The child's parent is informed on the same day.
- In cases of serious misbehaviour, such as racial or other abuse, we make clear immediately the unacceptability of the behaviour and attitudes, by means of explanations rather than personal blame.
- We do not shout or raise our voices in a threatening way to respond to children's inconsiderate behaviour.

## Children under three years

- When children under three behave in inconsiderate ways we recognise that strategies for supporting them will need to be developmentally appropriate and differ from those for older children.
- Springboard Nursery recognises that babies and very young children are unable to regulate their own emotions, such as fear, anger or distress, and require sensitive adults to help them do this.
- Common inconsiderate or hurtful behaviours of young children include tantrums, biting or fighting. Staff are calm and patient, offering comfort to intense emotions, helping children to manage their feelings and talk about them to help resolve issues and promote understanding.
- If tantrums, biting or fighting are frequent, we try to find out the underlying cause - such as a change or upheaval at home, or frequent change of carers. Sometimes a child has not settled in well and the behaviour may be the result of 'separation anxiety'.
- We focus on ensuring a child's attachment figure in the setting, their key person, is building a strong relationship to provide security to the child.

## Rough and tumble play, hurtful behaviour and bullying

Our procedure has been updated to provide additional focus on these kinds of inconsiderate behaviours.

## Rough and tumble play and fantasy aggression

Young children often engage in play that has aggressive themes – such as superhero and weapon play; some children appear pre-occupied with these themes, but their behaviour is not necessarily a precursor to hurtful behaviour or bullying, although it may be inconsiderate at times and may need addressing using strategies as above.

- Springboard Nursery recognise that teasing and rough and tumble play are normal for young children and acceptable within limits. We regard these kinds of play as pro-social and not as problematic or aggressive.
- We will develop strategies to contain play that are agreed with the children, and understood by them, with acceptable behavioural boundaries to ensure children are not hurt.
- We recognise that fantasy play also contains many violently dramatic strategies, blowing up, shooting etc., and that themes often refer to 'goodies and baddies' and as such offer opportunities for us to explore concepts of right and wrong.
- We are able to tune in to the content of the play, perhaps to suggest alternative strategies for heroes and heroines, making the most of 'teachable moments' to encourage empathy and lateral thinking to explore alternative scenarios and strategies for conflict resolution.

## Hurtful behaviour

Springboard Nursery take hurtful behaviour very seriously. Most children under the age of five will at some stage hurt or say something hurtful to another child, especially if their emotions are high at the time, but it is not helpful to label this behaviour as 'bullying'. For children under five, hurtful behaviour is momentary, spontaneous and often without understanding of the feelings of the person whom they have hurt.

- We recognise that young children behave in hurtful ways towards others because they have not yet developed the means to manage intense feelings that sometimes overwhelm them.
- We will help them manage these feelings as they have neither the biological means nor the cognitive means to do this for themselves.
- We understand that self-management of intense emotions, especially of anger, happens when the brain has developed neurological systems to manage the physiological processes that take place when triggers activate responses of anger or fear. Therefore we help this process by offering support, calming the child who is angry as well as the one who has been hurt by the behaviour. By helping the child to return to a normal state, we are helping the brain to develop the physiological response system that will help the child be able to manage his or her own feelings.
- We do not engage in punitive responses to a young child's rage as that will have the opposite effect.
- Our way of responding to pre-verbal children is to calm them through holding and cuddling. Verbal children will also respond to cuddling to calm them down, but we offer them an explanation and discuss the incident with them to their level of understanding.
- We recognise that young children require help in understanding the range of feelings they experience. We help children recognise their feelings by naming them and helping children to express them, making a connection verbally between the event and the feeling. "Adam took your car, didn't he, and you were enjoying playing with it. You didn't like it when he took it, did you? Did it make you feel angry? Is that why you hit him?" Older children will be able to verbalise their feelings better, talking through themselves the feelings that motivated the behaviour.
- We help young children learn to empathise with others, understanding that they have feelings too and that their actions impact on others' feelings. "When you hit Adam, it hurt him, and he didn't like that and it made him cry."
- We help young children develop pro-social behaviour, such as resolving conflict over who has the toy. "I can see you are feeling better now and Adam isn't crying any more. Let's see if we can be friends and find another car, so you can both play with one."
- We are aware that the same problem may happen over and over before skills such as sharing and turn-taking develop. In order for both the biological maturation and cognitive development to take place, children will need repeated experiences with problem solving, supported by patient adults and clear boundaries.
- We support social skills through modelling behaviour, through activities, drama and stories. We build self-esteem and confidence in children, recognising their emotional needs through close and committed relationships with them.

- We help a child to understand the effect that their hurtful behaviour has had on another child; we do not force children to say sorry, but encourage this where it is clear that they are genuinely sorry and wish to show this to the person they have hurt.

When hurtful behaviour becomes problematic, we work with parents to identify the cause and find a solution together. The main reasons for very young children to engage in excessive hurtful behaviour are that:

- They do not feel securely attached to someone who can interpret and meet their needs – this may be in the home and it may also be in the setting.
- Their parent, or carer in the setting, does not have skills in responding appropriately, and consequently negative patterns are developing where hurtful behaviour is the only response the child has to express feelings of anger.
- The child may have insufficient language, or mastery of English, to express him or herself and may feel frustrated.
- The child is exposed to levels of aggressive behaviour at home and may be at risk emotionally or may be experiencing child abuse.
- The child has a developmental condition that affects how they behave.
- Where this does not work, we use the Code of Practice to support the child and family, making the appropriate referrals to a Behaviour Support Team where necessary.

## Bullying

We take bullying very seriously at Springboard Nursery. Bullying involves the persistent physical or verbal abuse of another child or children. It is characterised by intent to hurt, often planned, and accompanied by an awareness of the impact of the bullying behaviour.

We define a child who is bullying as a child who has reached a stage of cognitive development where he or she is able to plan to carry out a premeditated intent to cause distress in another.

Bullying can occur in children five years old and over.

If a child bullies another child or children:

- We show the children who have been bullied that we are able to listen to their concerns and act upon them.
- We intervene to stop the child who is bullying from harming the other child or children.
- We explain to the child doing the bullying why her/his behaviour is not acceptable.
- We give reassurance to the child or children who have been bullied.
- We help the child who has done the bullying to recognise the impact of their actions.
- We make sure that children who bully receive positive feedback for considerate behaviour and are given opportunities to practise and reflect on considerate behaviour.
- We do not label children who bully as 'bullies'.
- We recognise that children who bully may be experiencing bullying themselves or be subject to abuse or other circumstance causing them to express their anger in negative ways towards others.

- We recognise that children who bully are often unable to empathise with others and for this reason we do not insist that they say sorry unless it is clear that they feel genuine remorse for what they have done. Empty apologies are just as hurtful to the bullied child as the original behaviour.
- We discuss what has happened with the parents of the child who did the bullying and work out with them a plan for handling the child's behaviour; and
- We share what has happened with the parents of the child who has been bullied, explaining that the child who did the bullying is being helped to adopt more acceptable ways of behaving.
